Comments Report

1. Standard Questions about this module

1.12) Please provide comments to explain or clarify your ratings above. Comments may be related to teaching delivery, module organisation, coursework or anything else which would help us to improve the module for the next session. Please be as concise as possible.

- I cannot fault this module, it is very well organised and ran. It provides a great insight to the teaching side of Computer Science, whilst providing a good balance of written and practical work. It is definitely in my top three modules from the entire course!

- Seb is fantastic and really went out of his way to help me
  The lectures were very interesting and provided a genuinely useful foundation of knowledge
  The assignment structure was a very fair assessment of skills
  This module is 7.5 credits per semester. I have taken other 7.5 credit modules which actually have comparable amounts of content to 15 credit modules, and this was not one of them. Very fair amounts of work.

1.13) Please list up to three ways in which the module could be improved

The evaluation will not be displayed due to low response rate.

2. Additional Questions about this module

2.1) Please list up to three things that you liked about this module.

- -valuable outreach days
  -balance of written and practical work
  -support from module co-ordinator
- Teaches practical life skills outside of programming and maths, which I would argue are far more useful in making students employable when they graduate
  Seb is a great lecturer and really cares about the module, the event days, and his students
